About Chun Wo

Chun Wo Development Holdings Limited ("Chun Wo") was founded in 1968 and is the core member of Asia Allied Infrastructure Holdings Limited (stock code: 00711.HK). Chun Wo is principally engaged in the core construction and property development businesses with the professional capability to undertake large integrated construction projects.

With deep roots in Hong Kong for 50 years, Chun Wo has accumulated extensive experience and a strong position in the construction sector enabling it to expand businesses to countries along the "Belt & Road" route in Southeast Asia. Examples of such expansion are the acquisition of a construction and engineering consultancy in Singapore and contracting the Design and Construction of Aqueduct undertaken in the Philippines during recent years.

KNOWLEDGE SHARING RESOURCES

Proceedings of the Second Think Tanks Development Forum: Exploring Knowledge Solutions for Regional Cooperation and Integration

These proceedings summarize the Second Think Tanks Development Forum with the theme of "Exploring knowledge solutions for regional cooperation and integration". It discusses the state of economic cooperation and integration in the CAREC region; avenues for cooperation in infrastructure and trade; and institutional development and the way forward for think tanks, in particular the establishment of the CAREC Think Tanks Network.

Proceedings of the Greater Mekong Subregion Urban Development and Planning Training Program

These proceedings summarize a training program on urban development and planning in the People's Republic of China for the benefit of key officials of Greater Mekong Subregion (GMS) countries.

Book: Improving Logistics for Perishable Agricultural Products in the People's Republic of China

In the PRC, some 30% of perishable agricultural products are lost before reaching consumers. Improving Logistics for Perishable Agricultural Products in the People's Republic of China reports on the logistics of efficiently moving produce to the tables of more than 1 billion consumers. Aimed at agricultural policy makers in the PRC, the report also offers lessons and guidance for other developing economies in the Asia-Pacific region.

6th People's Republic of China-ADB Knowledge-Sharing Platform: Workshop on Deepening Public-Private Partnerships in Asia and the Pacific

The Knowledge-Sharing Platform workshop was attended by more than 100 participants from 18 countries. Sponsored by the PRC Ministry of Finance and ADB, and co-organized by the Public-Private Partnership (PPP) Research Committee led by the Research Institute for Fiscal Science, the workshop focused on new developments in PPPs, both regionally and abroad, while also discussing the enabling factors for a successful PPP in the context of ideal PPP models, and good practice in terms of PPP fiscal management.

Sustainable Vocational Training Toward Industrial Upgrading and Economic Transformation

Workshops held in Beijing and Guangzhou in December 2013, supported and organized by the Regional Knowledge Sharing Initiative (RKSI), discussed best practice and models for vocational training, as well as the various supporting roles that government, the private sector, and vocational schools can play. The workshop agenda also included discussions of vocational-training financing and policy.

Book: Economics of Climate Change in East Asia

A regional study, Economics of Climate Change in East Asia examines strategies that the PRC, Japan, the Republic of Korea, and Mongolia can adopt that combine adapting to climate change and reducing greenhouse gas emissions in the years ahead of 2050. It also considers the medium-term climate change adaptation costs involved for sectors such as agriculture, coastal protection, and infrastructure, while also taking into account the long-term potential effectiveness of climate change adaptation and mitigation policies.

FEATURED VIDEOS

Year-In-Review

The PRCF sponsored RKSI organized 36 conferences, workshops, trainings, lectures, and/or seminars in 2019 reaching out to over 2800 participants. Of these, three-fourths were south-south knowledge sharing events. Watch these highlights and more in our Year-In-Review video.

Winning the Fight Against Air Pollution in Ulaanbaatar

Declan Magee, Senior Country Economist from ADB Mongolia Resident Mission, shared Mongolia's fight against air pollution with PRCM colleagues on 11 October 2019. Subsequent discussions were open and lively touching on London's infamous air pollution problem in the 19th century, PRC's recent and evolving experience, the need for a holistic and long-term plan, and capacity and commitment of policymakers, among others.

The journey towards something truly unique starts today...

[click here to learn more](#)

OSM makes awesome on-trend retail ready products and engineered soft goods for global brands. Our services include consumer driven design, product development, scalable mass production and supply chain management solutions.

WHO WE ARE

Founded in Sweden, our heritage influences our design thinking, aesthetics and ethical conduct.

We operate our own factory and have developed an exceptional global supply chain.

We have a Global presence with regional representation.

We conduct global consumer trend research to understand the wants and needs of consumers.

Working with world class brands for over 14 years, and having made in surplus of 350 million products, we have a refined understanding of what brands seek in developing world class products.

WHAT WE DO

DESIGN

TREND STUDIES

IN-HOUSE MATERIAL EXPERTISE

CONCEPT DESIGN

DEVELOP

DESIGN EVALUATION (DFM)

TOOLING & FIXTURE DESIGN & CREATION

PROTOTYPING / PROOF OF CONCEPT SAMPLES

ENGINEERING BUILDS (DVT,EVT)

MAKE

CUSTOM FIXTURES

CUSTOM TESTERS

INTEGRATION & TESTING

MANUFACTURING BUILDS (LINE QUALIFICATION, PVT & RAMP)

DESIGN

We develop your ideas to build to your specific design requests; Or you can define your brand, your audience and your budget and we'll deliver ideas to match.

DEVELOP

We verify that designs match customer needs through early stage prototyping and proof of concept before moving to full-fledged product development. This fail fast approach provides a quicker feedback loop into the design process.

ENGINEER

We develop mature designs into products ready for mass production. At this stage we identify and address potential manufacturing issues to ensure overall realization success.

MANUFACTURE

We promise brand owners total quality and compliance because we have full control of the production cycle through our in-house manufacturing capabilities.

TESTING

OSM has a fully certified test lab that allows us to issue test certificates as a third party test facility.

WHO WE SERVE

TECH

OSM focuses on New Product Introduction (NPI) for Original Equipment Manufacturer (OEM) clients by optimizing time to market, quality assurance, and value-based manufacturing solutions...

LUXURY

Luxury products are evolving to meet the desires of the technology centered consumer while introducing new and exciting innovations in sustainable materials and construction techniques...

OUTDOOR

To meet the needs of specific use case scenarios, outdoor products are pushing the boundaries of what's possible...

MEDICAL

Consumer medical devices require reliable and precise manufacturing solutions to empower patient centered healthcare...

How grit and determination can make or break your career

Article

Technique to help boost focus and concentration

ABOUT US

Hi, we are EntrepreLearn

What if entrepreneurship were taught with the same focus and passion that we teach academic study? It was a question that sparked an idea. There has never been a more exciting time in the world of business, with startups battling the more established brands and advances in tech creating whole new sectors to explore. But when it comes to learning how to be a successful entrepreneur, courses focus on theory and academics instead of helping inspire that dynamism that disrupts the business world and creates great ideas.

EntrepreLearn is the knowledge hub that aims to change all that. We teach the practical skills you need to make it with your business ideas. And we bring together visionaries from startups that have already made it to share their advice. Through our online business startup courses, thought leadership interviews and exploration of exciting new technologies, we arm you with everything you need to define the future of business.

[Our Community](#)

Our Founder

I founded EnrepreLearn after experiencing my own frustrations when it came to building a career.

At the age of 16 I started on the path of entrepreneurship, inspired by a childhood living all over the world and time spent in the startup hub of Hong Kong. My first venture was the event management company KongKrete Jungle, created while I was still at school, and we booked artists ranging from Grandmaster Flash and Biggie Smalls' DJ, to Adventure Club and Krewella.

I then studied at the University of Sydney and earned a BA, but when it came to advancing my education as an aspiring entrepreneur, I found that learning options were still too focused on the conventional route of a corporate career. Those places teaching anything to do with business and entrepreneurship lacked practical and compelling options and seemed so dry for such a fascinating topic.

So I decided to create the EntrepreLearn community, a place where people could come together, study the best online business courses for entrepreneurs and learn, not just from teachers, but from other professionals.

Erik Livingston

Founder, EntrepreLearn

BEGIN YOUR JOURNEY HERE

Grow with us

One of the best attributes of an entrepreneur is the ability to dream big. And we're no different. At EntrepreLearn we have so many ideas for business startup courses, and we always work with true business leaders to help entrepreneurs on their journey towards financial freedom.

Our aim is to develop our platform into a buzzing community of like-minded, impatient, and hungry entrepreneurs from around the world who will help and support each other.

In our courses, we explore new technologies and speak to leaders for the latest insights because we believe that there is so much exciting and compelling material emerging from dynamic trading environments that traditional education just can't keep up.

What started with a deep dive into augmented reality is now developing into so many more exciting topics across our online business courses for entrepreneurs and we're excited to see how our members and students change the world.

ABOUT US

More than just internet of things

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.
